Email: goyallovish1727@gmail.com
Mobile: 8607605196

EDUCATION:

Ambala, India
Bachelor of Technology

Kurukshetra University
Computer Science and Engineering

July 2021 – June 2025
CGPA: 8.06

EXPERIENCE:

Application Developer **Codroidhub Pvt Ltd** **Nov, 2024 – May, 2026**

- Developed and deployed 5+ Flutter applications including 3 internal platforms and 2 client projects, managing the complete Play Store release pipeline.
- Integrated 100+ REST APIs, Payment Gateway, AdMob, and real-time chat/calling features using Agora, Firebase, MongoDB, Supabase, and MySQL.
- Provided application support, troubleshooting, and issue resolution for production applications while collaborating with cross-functional teams.

Application Developer **Altruist Technologies** **Jul, 2024 – Oct, 2024**

- Worked on Flutter frontend development, REST API integration, Linux environments, and MySQL database operations.
- Assisted in application support, debugging, issue analysis, and development of backend-connected features.

Application Developer **Mohesu Enterprises** **Jun, 2022 – Dec, 2022**

- Developed frontend and backend modules for 2 client projects using Flutter and REST APIs.
- Worked on UI implementation, local database management, API integration, and troubleshooting application issues.

TECHNICAL PROJECTS:

SahiPath - Tech Opportunity Platform:

- Built and deployed a Flutter application on Google Play Store for discovering internships, hackathons, and technical events through API-driven workflows.
- Optimized application performance by reducing startup time (~40%), minimizing redundant API calls, and improving UI rendering efficiency using caching and efficient state management.
- Designed a scalable, feature-based architecture with optimized state management and caching layers for consistent performance.

CortexKit – Free AI Tools Directory:

- Developed a Flutter-based AI tools discovery platform enabling users to search, explore, and manage curated AI tools with personalized collections, improving accessibility to AI resources.
- Implemented offline-first support using Hive along with Firebase Cloud Messaging (FCM) for notifications, and optimized search/filtering for smooth user experience.

Marketplace Application

- Built a Flutter-based marketplace application with product browsing, category navigation, and cart management functionality using Firebase and REST APIs for dynamic data handling.
- Optimized UI performance using lazy loading, efficient state management, and reduced widget rebuild overhead for smoother and responsive user experience.

CERTIFICATIONS:

- Artificial Intelligence (NPTEL)** – Completed certification covering search algorithms and problem-solving techniques in AI.
- Introduction to IoT (NPTEL)** – Silver Medal recipient for performance in IoT fundamentals and system design concepts.
- Idea Exploration 3.0 (EPIC)** – Secured 3rd position in innovation and technical idea presentation competition.
- AWS Cloud Computing (CodroidHub)** – Completed hands-on training in AWS services, deployment, and cloud architecture fundamentals.

SKILLS:

- Strength:** Data Structures | Algorithms | OOP
- Tools & Technologies:** Git | MySQL | Flutter SDK | AWS Tools | Firebase | Google AdMob | CI/CD | Play Console
- Languages:** C/C++ | Java | Dart | Python | JS
